BEST PRACTICES

Title: “AAGEBADHO”- Step Ahead for Success

Objectives:

- Bridge the industry-academia gap.
- Provide comprehensive training in capacity building skills.
- Provide hands-on training with industry experts.
- Facilitate placement in reputable organizations.
- Prepare students for competitive exams.
- Promote higher education for specialized expertise.

The Context:

Practical-oriented studies enhance the value of education, but traditional laboratory experiments fall short of meeting industrial needs. To address this, we employ various methods to bridge the gap. Industries seek vibrant and adaptable students with strong communication and smart skills. Our training programs, in collaboration with reputable institutions and certifications, prepare students in diverse areas, ensuring they excel in competitive recruitment and higher education. By integrating industry training with academics, we equip students for success in both the job market and further studies.

The Practice:

KVSR SCOPS prioritizes recruitment by providing comprehensive pre-placement training, both technical and non-technical, to ensure students excel in interviews and recruitment procedures. Continuous counseling boosts students' morale and emphasizes the importance of maintaining good academic scores for successful placement. The placement and training cell designs modules that develop technical, logical, analytical, and managerial skills in students, with progress assessed through various training modules. Soft skill training programs enhance communication, presentation, leadership, and time management skills. Aptitude skill training improves reasoning, data interpretation, and analytical abilities. Technical skill training focuses on advanced techniques in fields like SAS and computer-aided drug design. Regular industrial visits and departmental events support fruitful placements, while technical sessions, GATE classes, and higher education guidance further foster career development.

Evidence of success:

After the successful completion of pre-placement training, we have witnessed significant improvements in the personal and technical skills of our students. They excel in communication, exhibit a positive attitude during interviews, and possess a high level of confidence.

Employers and parents have praised our placement support, highlighting our success in preparing students for the industry. We consistently observe improvements in the quality of placements with students securing positions in renowned companies. Our students and alumni excel as aspiring entrepreneurs, showcasing their practical understanding and innovative ideas. Their knowledge of current industry trends boosts their selection during campus interviews. Our comprehensive personality development programs enhance confidence, communication skills, and employability, leading to improved placements and higher selection rates in competitive exams.

Problems encountered and Resources required:

KVSRSCOPS prioritizes pre-placement training but some students lack commitment and need close monitoring and mentoring. To address this, a strong mentoring and counseling system supports rural students, focusing on improving communication and essential skills. Special classes boost confidence and prepare students for professional challenges. FDPs ensure updated knowledge in evolving technologies for effective student training.

Notes:

Pharm.D. students actively participate in clinical practices, disease detection, and community services. They receive hands-on training in modern technologies and are exposed to entrepreneurship opportunities. The program includes internships, specialty postings, and project work. Students present their work in seminars and conferences, engaging with technical experts in their field.
