6.5.2 The institution reviews its teaching learning process, structures & methodologies of operations and learning outcomes at periodic intervals through IQAC set up as per norms. Describe any two examples of institutional reviews and implementation of teaching learning reforms facilitated by the IQAC within a maximum of 200 words each

The institution ensures quality through an inclusive IQAC-driven mechanism involving teaching and non-teaching staff. By innovating programs and teaching techniques to cater to diverse learners, the teaching-learning process is continuously reviewed by IQAC, department heads, and mentors. Structured feedback from stakeholders and student-parent-teacher meetings guide improvements for excellence.

Reform based on Teaching-Learning approach:

IQAC actively oversees the teaching-learning process from the academic year's start to semester end. It evaluates departmental activities against the academic calendar and promotes student-centered teaching to develop multidimensional skills. Programs like aptitude tests, quizzes, and competitive exam coaching enhance employability, while faculty ensure curriculum delivery aligns with program outcomes.

Curriculum enrichment and review: The enriched curriculum integrates theory, practicals, ethics, MOOCs, and skill-based programs, preparing students for the pharmaceutical domain. Feedback from stakeholders is analyzed to implement necessary improvements for quality enhancement.

Faculty training Programmes:

IQAC organizes faculty training, refresher, and exchange programs to enhance pharmaceutical knowledge and research skills, ensuring improved teaching methods that elevate students' learning capabilities and align with current industry trends.

Feedback system: Collection of feedback by IQAC at every step gave a chance of improvement of teaching learning process.
